Languages: English · Urdu · Punjabi

SUMMARY

Machine Learning-focused Artificial Intelligence undergraduate with a 3.46/4.00 CGPA and hands-on experience developing 10+ academic and personal AI projects. Proficient in Python, Java, scikit-learn, SQL, data analysis, feature engineering, model evaluation, and model deployment. Strong foundation in Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), and software development, with experience building user-facing applications in collaborative, agile environments. Passionate about applying AI and machine learning to solve real-world problems.

SKILLS

Languages: Java, Python, C++, HTML, CSS, JavaScript

AI & ML: NumPy, Pandas, scikit-learn, Matplotlib

Concepts: Machine Learning, Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), Big-O Analysis, Deep Learning, Generative AI

Databases: MySQL

Tools: Git, GitHub, Visual Studio Code, AntiGravity, GitHub Copilot, Claude, Claude Code

PROJECTS

Customer Churn Prediction System : 🌐 churnex.vercel.app (Team Project — ML Coursework)

Handled data preprocessing and model selection for a team-built machine learning system predicting telecom customer churn. Trained and evaluated 6 models (Logistic Regression, Decision Tree, KNN, MLP, Linear Regression, K-Means) to identify the best performer, determining Logistic Regression as optimal at 84% accuracy and 71% F1-score.

Tech Stack: Python, pandas, NumPy, scikit-learn, Matplotlib

Predictly : 🌐 predict-home.vercel.app

An AI-powered web application that predicts property valuations for the Pakistani housing market using a trained machine learning model. Built end-to-end — from data preprocessing and model training to a deployed full-stack interface — allowing users to input property details and receive instant, data-driven price estimates.

Tech Stack: Python, scikit-learn, pandas, NumPy, Flask/FastAPI, HTML/CSS, JavaScript, Vercel

Smart Doctor AI : 🌐 smartdoctor-ai.vercel.app

An AI-powered medical assistant web application that allows users to describe symptoms and receive instant, intelligent health insights. Built to demonstrate practical NLP and AI integration in a healthcare context, the app leverages large language model APIs to provide clear, conversational guidance and potential diagnoses.

Tech Stack: Python, JavaScript, HTML/CSS, LLM APIs, Vercel

Developer Portfolio : 🌐 abdulwahid.me

A fully responsive personal portfolio website highlighting projects, skills, and experience as an AI/ML developer. Designed with a clean, modern aesthetic and optimised for performance — featuring animated sections, project cards with live links, and a working contact system.

Tech Stack: HTML, CSS, JavaScript, Vercel

EDUCATION

BS in Artificial Intelligence

COMSATS University Islamabad – Attock Campus

August 2024 – 2028

CGPA: 3.46 / 4.00

ICS – Intermediate in Computer Science

FAZAIA Degree College, ARF Kamra

2022 – 2024

827/1100 (75.2%)

COMPETITIONS AND EVENTS

Participant — MTM 2026: Mind to Machine AI Hackathon

12 May 2026

Google Developer Groups (GDGoC) · COMSATS University Wah Campus

Selected to participate in MTM 2026 — Pakistan's premier fully in-house AI hackathon, organised by **Google Developer Groups on Campus (GDGoC)**.

Demonstrated exceptional skill, dedication, and innovative problem-solving across AI/ML challenges in a competitive, time-constrained environment.

Earned a verified [Certificate of Participation](#), signed by the Campus Lead and Faculty Head of **GDGoC**.

CERTIFICATES

Google AI Essential Specialization

31 May 2026

Google Career Certificates · Coursera

Successfully completed the **Google AI Essentials Specialization**, a comprehensive AI learning pathway developed by Google to build practical artificial intelligence skills for modern workflows.

Demonstrated proficiency in **AI fundamentals, prompt engineering, AI-powered productivity tools, responsible AI practices, and emerging AI trends** through hands-on learning across five specialized courses.

Earned a verified [Google AI Essentials Specialization Certificate](#), issued by **Google Career Certificates and Coursera**, validating successful completion of the full specialization curriculum.

AI & Machine Learning Developer

Feb - May 2026

Programming Hub

Successfully completed the **Machine Learning with NumPy, pandas, scikit-learn, and More** certification course, demonstrating commitment to advancing practical machine learning and data science skills.

Developed proficiency in **data preprocessing, exploratory data analysis, machine learning workflows, and model implementation** using industry-standard Python libraries including NumPy, pandas, and scikit-learn.

Earned a verified [Certificate of Completion](#), issued by **Programming Hub**, recognizing successful completion of the course requirements and assessments.
