PROFESSIONAL SUMMARY

Artificial Intelligence undergraduate with a 3.46 out of 4.00 CGPA and hands-on experience across 10+ academic and personal AI/ML projects, spanning data preprocessing, model training, and evaluation using Python and scikit-learn. Comfortable working across the ML lifecycle — from feature engineering and algorithm comparison to building full-stack applications that put models in front of real users. Strong foundation in Data Structures & Algorithms (DSA) and Object-Oriented Programming (OOP), with a growing focus on model explainability and production ML workflows.

EXPERIENCE

Machine Learning Intern July 2026 – September 2026

Ezitech Institute (Eziline Software House) Islamabad, Pakistan

- Trained and benchmarked XGBoost, LightGBM, and scikit-learn classifiers across 7 de-identified healthcare datasets, logging all experiments in MLflow and promoting the best model (LightGBM, 0.83 AUC-ROC) to production in the model registry.
- Built a SHAP-based explainability layer that produces patient-level prediction explanations, served through FastAPI REST endpoints
- Developed an MLOps monitoring UI for dataset-drift detection and retraining triggers; containerized the ML service with Docker for cloud deployment.

Tech Stack: *Python, FastAPI, scikit-learn, XGBoost, LightGBM, SHAP, MLflow, Next.js, TypeScript, Supabase (PostgreSQL)*

PROJECTS

MediSight AI — Enterprise Healthcare Risk Prediction & Clinical Decision Support Platform Live | GitHub

- Built end-to-end platform with 7 disease-risk models (diabetes, heart disease, stroke, CKD, liver, breast cancer, hypertension) using XGBoost/LightGBM; achieved 0.83 AUC-ROC on production model
- Integrated SHAP explainability and MLflow tracking for model monitoring; implemented drift detection (PSI) and automated retraining pipeline

Tech Stack: *Python, FastAPI, scikit-learn, XGBoost, LightGBM, SHAP, MLflow, Next.js, TypeScript, Supabase (PostgreSQL)*

Customer Churn Prediction System: (Team Project — ML Coursework) Live | GitHub

- Engineered the data preprocessing and model evaluation pipeline using telecom customer data.
- Benchmarked multiple supervised and unsupervised algorithms, including Logistic Regression, Decision Tree, K-Nearest Neighbors (KNN), Multilayer Perceptron (MLP; selected Logistic Regression based on evaluation performance, achieving 84% accuracy and 71% F1-score.

Tech Stack: *Python, pandas, NumPy, scikit-learn, Matplotlib*

Study Hub (FA24-BAI): *AI-Powered Study Resource Platform* Live | GitHub

- Built and deployed a serverless web app that organizes course resources (CDFs, lab manuals, syllabuses) across 4 courses, with search, type filters, favorites/recents, and installable PWA support.
- Integrated the Gemini API to generate document summaries, practice quizzes, and viva questions on demand; implemented password-protected admin upload/delete using the GitHub API as the storage layer.

Tech Stack: *JavaScript, HTML/CSS, Node.js, Vercel Serverless Functions, Gemini API, GitHub API*

Predictly: Live | GitHub

- Built an AI-powered real estate valuation dashboard for the Pakistani housing market, engineering a localized pricing model across 6 major cities and an on-device computer-vision pipeline that scores uploaded property photos (brightness, color richness, contrast, sharpness) into a 0–100 condition rating — fully offline, with zero external API dependency.

Tech Stack: *Python, Flask, HTML/CSS, JavaScript, Vercel*

EDUCATION

BS in Artificial Intelligence August 2024 – 2028

COMSATS University Islamabad – Attock Campus CGPA: 3.46 / 4.00

ICS – Intermediate in Computer Science 2022 – 2024

FAZAIA Degree College, ARF Kamra 827/1100 (75.2%)

SKILLS

Languages: Python, Java, C++, HTML, CSS, JavaScript.
ML & Data Science: scikit-learn, NumPy, Pandas, Matplotlib, MLflow, SHAP.
Frameworks: FastAPI, Flask, Next.js, React
Databases & Backend: MySQL, PostgreSQL, Supabase, Node.js
Concepts: Machine Learning, Generative AI, Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), Big-O Analysis, REST APIs.
DevOps & Tools: Git, GitHub, Vercel, Docker.
AI-Assisted Development: GitHub Copilot, Claude, Claude Code, Antigravity.

EXTRACURRICULAR ACTIVITIES

Participant — DeepBuild Hackathon October 2026
SoftTech - COMSATS University Islamabad, Attock Campus

AI/ML Team Member 2026 - 2027
Google Developer Groups On Campus (GDGoC) · COMSATS University Islamabad, Attock Campus

Participant — MTM 2026: Mind to Machine AI Hackathon ↗ May 2026
COMSATS University Islamabad, Wah Campus

CERTIFICATES

Google AI Essential Specialization ↗
May 2026
Google Career Certificates · Coursera

AI & Machine Learning Developer ↗ Feb - April 2026
Programming Hub

Portfolio & Projects: www.abdulwahid.me
